BLAST OR BUST

MODULE 0: CORE RULES

THE ASH WASTES

The world forged in *Ten Earth Shattering Blows* is cruel, unforgiving, and scorched beneath an incinerating sun. You are not legendary heroes or untouchable mages; you are hungry scavengers scraping through ruins of an obliterated civilization, armed with salvaged iron and stubborn grit.

WHAT YOU NEED TO PLAY

To venture forth, you need 1 Character Sheet per player, pencils, and scrap paper. Most importantly, you will need **multiple full sets of polyhedral dice** (d4, d6, d8, d10, d12, d20). Greed will tempt you to roll often—keep them within arm's reach.

REFEREE PHILOSOPHY

The players are the driving force. The Referee describes the harsh environment, adjudicates intent, and enforces consequences, but **the players roll all the dice**. The wasteland is completely indifferent to survival: brazen ingenuity is rewarded, while hesitation invites disaster.

EVERYTHING IS COMBAT

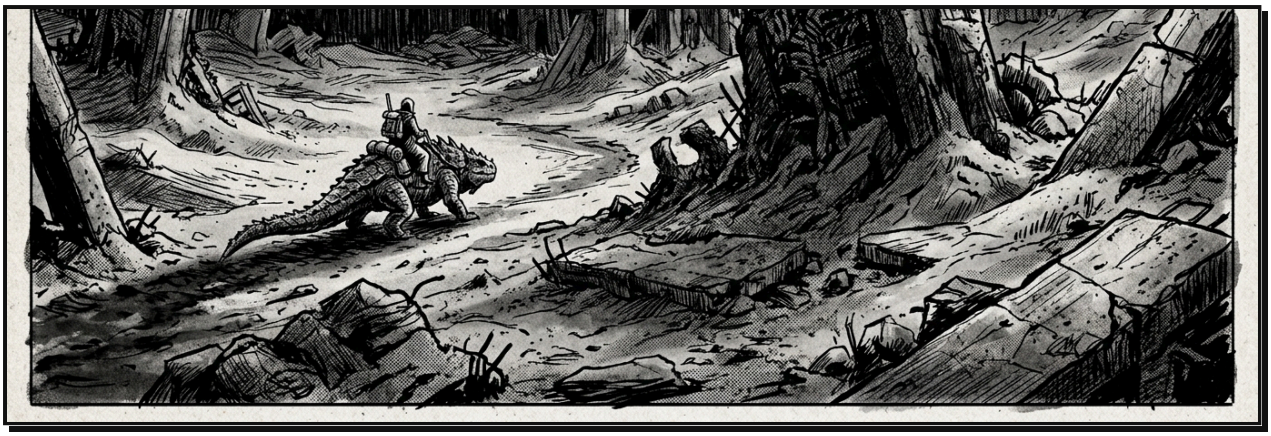

Passive skill checks do not exist. Any barrier—a rusted bulkhead door, a boiling toxic geyser, a hostile sentry line, a high-stakes bribe, or a ravenous wasteland beast—is treated as an active adversary with **Hit Points (HP)**. Overcome it by breaking its HP before its lethal Counterattacks break you.

ANATOMY OF AN OBSTACLE

1. **Difficulty Threshold:** The minimum total sum required to score a hit. Low (14+), Medium (17+), Severe (20+).
2. **Permitted Attributes:** The Referee assigns 1 Physical and 1 Mental attribute viable for the task.
3. **Health Pool (HP):** Minor hazard (10-15 HP), Serious confrontation (20-30 HP), Apex threat (40-60+ HP).
4. **Counterattack:** What the obstacle inflicts at the end of your turn if it is still alive, or when you Bust (Direct damage, lost gear, toxic exposure).

THE ESCALATION CLOCK

Every turn spent without reducing an obstacle's HP allows the environment to sour. The sun rises higher, the mud thickens, and survival narrows.

PLAYER ATTRIBUTES

Each recruit possesses 6 Attributes split into two domains. **Physical**: Strength (STR), Agility (AGI), Constitution (CON). **Mental**: Wits (WIT), Knowledge (KNO), Presence (PRE).

Each attribute is tied to a polyhedral die. In *Blast or Bust*, **die size is inverse to competence**:

MASTERY → → → → → INCOMPETENCE

CONFLICT RESOLUTION SEQUENCE

When acting against an Obstacle, execute this 4-step sequence:

1. **Declare Approach:** Select either the Physical or Mental Attribute permitted by the Obstacle.
2. **Sequential Dice Rolling:** Roll your designated Attribute Die repeatedly, accumulating the sum. You must continue rolling additional dice until your total equals or exceeds the **Difficulty Threshold**. Once met, choose whether to stop or push your luck further without busting (> 21).
3. **Damage Roll:** On a success, collect all dice rolled in that sequence and reroll all of them: the sum of all results is the total damage dealt to the Obstacle's HP.
4. **Counterattack:** Now, **if the Obstacle is still alive (HP > 0), you suffer the Obstacle's Counterattack!**

THE RULE OF 21: STEP 2 OUTCOMES

Threshold Success (Landing within [Threshold – 20]): You may stop rolling and choose to do so: deal damage to the Obstacle's HP. *Go to Step 3.*

Natural Success 21: Critical Success! The GM grants an Epic Outcome: deal maximum possible damage, gain an immediate tactical advantage, or negotiate a dramatic narrative effect. *Go to Step 3.*

Bust (> 21): Failure! Deal 0 damage. *Go to Step 4.*

DAMAGE, COUNTERATTACK & SUPPORT

Stopping as soon as you meet the Threshold guarantees a **Damage Roll (Step 3)**, *but if your damage does not reduce the Obstacle to 0 HP, it still strikes you back in Step 4!*

Smaller dice grant granular control, letting you push closer to 21 to stack 4 or 5 dice safely—giving your Damage Roll the firepower to slay the Obstacle in one blow and avoid its Counterattack altogether.

THE SUPPORT ACTION

An ally may expend their turn to Support the active player. If the active player **Busts (> 21)**, **instantly discard the last die rolled**. Resume from the prior total and decide immediately to hold or push on!

HEALTH, STRESS & DEATH

Recruits track two survival pools:

- **Physical Points (HP):** Flesh, bones, armor. At **0 HP**, you become *Incapacitated*. Forbidden from actions using STR, AGI, or CON.
- **Mental Points (MP):** Sanity, nerve, morale. At **0 MP**, you become *Broken*. Forbidden from actions using WIT, KNO, or PRE.
- **True Death:** Occurs strictly when both **HP and MP reach 0 simultaneously**. So long as one pool remains, a recruit clings to life!

TACTICAL RECOVERY

Breathing dust in a moment of calm restores 1d4 points to the pool of your choice. True healing requires sanctuary, boiled water, and intact bone needles.

THE WELL-FORTRESS

Survivors of the White Ash Wastes: a scorching midday sun rises to flay the flesh from your bones. Your only salvation looms on the scorched horizon: the Well-Fortress, a brutalist bastion of rusted iron and desperate violence.

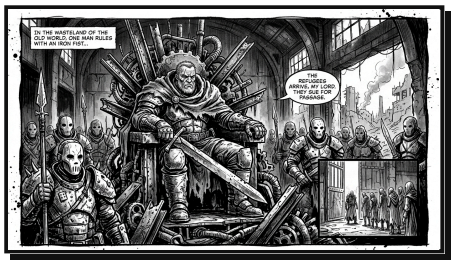

ACT I: RACING THE SUN

Incandescent dawn crests behind you, turning air into searing poison. You must sprint through the gorge toward the fortress shadow, dodging boiling acid geysers and unstable Old World concrete slabs buried under ash.

Obstacle: Ash Waste (HP 25 | Severe 20+)
Viable Approaches: AGI (sprinting, sliding under crumbling rubble), WIT (spotting solid bedrock trails).
Counterattack: Seared Lungs. Blinding heat flays exposed skin: 1d4 damage to the entire party.

ACT II: THE MAW OF THE BASTION

You collapse gasping under the iron portcullis. Facing you is the Regent's Guard: emaciated thugs draped in heavy scrap plate. From an iron parapet above, the Regent sneers. Entry has a price, and your lives are worth nothing unless proven in blood.

Obstacle: The Guards & the Regent (HP 30 | Low 14+)
Viable Approaches: PRE (furious intimidation or desperate bartering), STR (shoving through the spear line).
Counterattack: Cruel Bastion. Beaten back or scalded by boiling slag: 1d6 damage (player chooses HP or MP).

ACT III: THE MUD RITE

You have earned the "privilege" to fight for sanctuary. Shoved through iron grates into a sunken arena flooded with viscous mud and blood, the pit gate creaks open. Out lumbers the Pit Champion: a towering horror bolted into crude bone plating.

Obstacle: The Pit Champion (HP 30 | Medium 17+)
Viable Approaches: CON (grappling in choking mud), KNO (identifying weak joints in the bone plating).
Counterattack: Viscous Crush. Smashed into the muck: 1d4 damage plus suffocation (-2 additional HP).

BLAST OR BUST • REFEREE SCREEN

I • THE RULE OF 21 & RESOLUTION

TURN SEQUENCE (ALL IS COMBAT)

1. **Declare Approach:** Select either the Physical or Mental Attribute permitted by the Obstacle.
2. **Sequential Dice Rolling:** Roll your Attribute Die repeatedly, accumulating the sum until you equal or exceed the **Difficulty Threshold**. Then choose to stop or push further without busting (> 21).
3. **Damage Roll:** On a success, collect all dice rolled in that sequence and reroll all of them: their sum is total damage dealt to Obstacle HP.
4. **Counterattack:** Now, **if the Obstacle is still alive (HP > 0)**, suffer the Obstacle's Counterattack!

STEP 2 ROLL OUTCOMES

Result	Mechanical Effect
Threshold Success [Threshold – 20]	Stop rolling and deal damage to the Obstacle's HP. **Go to Step 3** (then Step 4 if Obstacle survives).
Natural 21 (Critical)	**Epic Outcome!** Deal max possible damage, gain immediate tactical advantage, or negotiate a dramatic narrative effect. **Go to Step 3.**
Bust (> 21)	Failure! Deal **0 damage**. **Go to Step 4** (immediately suffer the Obstacle's Counterattack).

TACTICAL PUSH & SUPPORT

Why Push? Chipping away with few dice leaves the Obstacle alive to Counterattack in Step 4. Stacking dice toward 21 lets you slay it in one blow!

Support: Ally spends turn helping. If active player *Busts (>21)*, **instantly discard the last die rolled**: resume from prior total!

II • ATTRIBUTES, DICE & HEALTH

DICE MASTERY SCALE

Mastery **D6 → D8 → D10 → D12 → D20** Incompetence

Golden Rule: Smaller dice (d6) give immense precision when creeping toward 21 and pile up heavy damage dice. The d20 is wild, unpredictable chaos.

THE 6 SURVIVAL ATTRIBUTES

Physical	Common Applications
STR (Strength)	Breaching bulkheads, heavy weapons, lifting rubble.
AGI (Agility)	Sprinting wastes, dodging geysers, stealth.
CON (Constitution)	Enduring heat, resisting poison, mud wrestling.
Mental	**Common Applications**
WIT (Wits)	Navigation, spotting traps, calm in panic.
KNO (Knowledge)	Deciphering Old World ruins, engines, glyphs.
PRE (Presence)	Intimidation, commanding respect, haggling.

HEALTH, STRESS & DEATH

Physical (HP): At 0 HP: *Incapacitated*. No STR, AGI, or CON actions.

Mental (MP): At 0 MP: *Broken*. No WIT, KNO, or PRE actions.

True Death: Occurs strictly when both HP and MP hit 0 simultaneously!

III • QUICK OBSTACLE GENERATOR

QUICK DIFFICULTY GUIDE

Difficulty	Threshold	Typical Encounters
Low	14+	Distracted sentry, rusted gate, basic climb.
Medium	17+	Pit brute, blinding ash storm, tense negotiation.
Severe	20+	Scorching midday sun, bone champion, collapsing vault.

HIT POINT SCALE (OBSTACLE HP)

Minor Hazard (10–15 HP)	Stuck hatch, scrap barricade, lone scavenger.
Standard Conflict (20–30 HP)	Guard patrol, ash desert trek, arena gladiator.
Boss / Colossus (40–60+ HP)	Megastructure gate, towering mutant, collapsing keep.

COUNTERATTACK ARSENAL

Direct Damage: 1d4 (burns/scrapes), 1d6 (crushing blow/humiliation), 1d8 (crippling trauma).

Complications: Gear wear, bogged down in mud (-2 HP & +2 to thresholds), ambient doom clock ticks.

REFEREE CREDO

"Everything is combat. Players roll all the dice. The wastes are indifferent and cruel, but reward brazen grit and desperate audacity."

CHARACTER SHEETS • RECRUITS

WARRIOR ARCHETYPE • LEVEL 1

PHYSICAL HEALTH MAX: 18	MENTAL HEALTH MAX: 9
CURRENT HP: _	CURRENT MP: _

STR STRENGTH (d10)	**WIT** WITS (d20)
AGI AGILITY (d20)	**KNO** KNOWLEDGE (d20)
CON CONSTITUTION (d12)	**PRE** PRESENCE (d20)

Special Item: Scrap Battleaxe

A brutal notched weapon forged from salvage. Gain an immediate bonus turn whenever you deal the killing blow to an obstacle.

SCOUT ARCHETYPE • LEVEL 1

PHYSICAL HEALTH MAX: 14	MENTAL HEALTH MAX: 13
CURRENT HP: _	CURRENT MP: _

STR STRENGTH (d20)	**WIT** WITS (d10)
AGI AGILITY (d4)	**KNO** KNOWLEDGE (d20)
CON CONSTITUTION (d20)	**PRE** PRESENCE (d20)

Special Item: Ash Sight Cloak

A threadbare tattered shroud that blends into soot. When acting in darkness or from cover, reroll once when you bust.

CHARACTER SHEETS • RECRUITS

KNIGHT ARCHETYPE • LEVEL 1

PHYSICAL HEALTH MAX: 16	MENTAL HEALTH MAX: 11
CURRENT HP: _	CURRENT MP: _

STR STRENGTH (10)	WIT WITS (20)
AGI AGILITY (20)	KNO KNOWLEDGE (20)
CON CONSTITUTION (16)	PRE PRESENCE (12)

Special Item: Corroded Medal of Valor

A relic of Old World discipline. Military foes or organized troops suffer half their max HP against your attacks.

CLERIC ARCHETYPE • LEVEL 1

PHYSICAL HEALTH MAX: 12	MENTAL HEALTH MAX: 15
CURRENT HP: _	CURRENT MP: _

STR STRENGTH (20)	WIT WITS (12)
AGI AGILITY (20)	KNO KNOWLEDGE (10)
CON CONSTITUTION (20)	PRE PRESENCE (16)

Special Item: Staff of Judgment

A knotted ash staff crowned with bone fetishes. As an action, roll 1d8 to inflict mental damage or terrify foes.

CHARACTER SHEETS • RECRUITS

ARCANIST ARCHETYPE • LEVEL 1

PHYSICAL HEALTH **MAX: 8**	MENTAL HEALTH **MAX: 19**
CURRENT HP: _	CURRENT MP: _

STR STRENGTH	**WIT** WITS
AGI AGILITY	**KNO** KNOWLEDGE
CON CONSTITUTION	**PRE** PRESENCE

Special Item: Ash-Bound Grimoire

You are the only one who can change reality by fighting it.

NOBLE ARCHETYPE • LEVEL 1

PHYSICAL HEALTH **MAX: 10**	MENTAL HEALTH **MAX: 17**
CURRENT HP: _	CURRENT MP: _

STR STRENGTH	**WIT** WITS
AGI AGILITY	**KNO** KNOWLEDGE
CON CONSTITUTION	**PRE** PRESENCE

Special Item: Frayed Aristocratic Doublet

Tattered rags of lost supremacy. In social disputes and negotiations, the Difficulty Threshold is fixed at "Low (14+)" against commoners.
